SAP ABAP RECAP P10

Hi, Edwin. When you submit this form, the owner will see your name and email address.

1. Which of the following is true about the SET PF-STATUS statement when used with the EXCLUDING addition?

   - It can only exclude function codes that are defined in the current status.
   - It can exclude any function code, regardless of whether it is defined in the current status.
   - It can exclude function codes only if they are defined in the global program context.
   - It can exclude function codes only if they are defined in the local program context.

2.

   - DATA: l_var LIKE kunnr.
   -
   - SELECT SINGLE kunnr INTO l_var FROM kna1 WHERE kunnr = '5'.
   -
   - WRITE: l_var.

   Is this syntactically correct?

   - Yes
   - No

- ◯ Maybe

3. What is the purpose of the EXPORT and IMPORT statements in ABAP?

- ◯ To transfer data between internal tables.
- ◯ To read and write data to/from the database.
- ◯ To transfer data between different ABAP programs.
- ◯ To perform arithmetic operations on data.

4. What is the effect of the COLLECT statement in ABAP?

- ◯ It sums up numeric fields of internal table entries with identical keys.
- ◯ It appends a line to an internal table.
- ◯ It deletes duplicate entries in an internal table.

5. Which of the following is not a valid ABAP event in classical reports?

- ◯ INITIALIZATION
- ◯ AT SELECTION-SCREEN
- ◯ START-OF-SELECTION
- ◯ AT USER-COMMAND

6. Which of the following statements about ABAP Object-Oriented Programming is false?

- ◯ ABAP supports multiple inheritance.
- ◯ ABAP objects can be instantiated using the CREATE OBJECT statement.
- ◯ ABAP interfaces can contain constants.

7. Which of the following is a valid way to define a table type in ABAP?

- ☐ TYPES: tt_table TYPE mara.
- ☐ TYPES: tt_table TYPE TABLE OF mara WITH EMPTY KEY.
- ☐ TYPES: tt_table TYPE MARA OCCURS 0

8. What is the primary purpose of the ENQUEUE and DEQUEUE statements in ABAP?

- ◯ To manage database transactions.
- ◯ To handle internal table operations.
- ◯ To manage locks on database objects.

9. Which of the following is true about the READ TABLE statement in ABAP?

- ◯ It can only be used with sorted tables.
- ◯ It always returns the first entry in the table.
- ◯ It can be used to read a specific entry based on a key.
- ◯ It deletes the entry after reading.

10. Which of the following is a key feature of persistent classes in ABAP?

- ◯ They can only be used in local programs.
- ◯ They automatically handle database transactions.
- ◯ They cannot be inherited.
- ◯ They do not support polymorphism.

11. Which data type cannot be used to define parameters?

- ◯ Type P
- ◯ Type F
- ◯ Type C
- ◯ Type N

12. Which annotation is used in a CDS view to enable and control fuzzy search on a field?

- ◯ =@Search.enableFuzzy
- ◯ =@Search.fuzzinessThreshold
- ◯ =@FuzzySearch.active

13. What must be done to the internal table before using READ TABLE ... WITH KEY ... BINARY SEARCH?

- ◯ It must be sorted in ascending order

- It must not be sorted
- It must be initialized
- It must be cleared

14. Which object is directly assigned to a table field in SE11?

- Domain
- Data element
- Conversion exit
- Parameter ID

15. If the subform content is flowed, will the order of the text elements inside that subform matter?

- True
- False
