SAP ABAP RECAP

Hi, . When you submit this form, the owner will see your name and email address.

1. You defined two DCL roles for the same CDS entity: Role A allows SalesOrg = 1000, Role B allows SalesOrg = 2000. A user has both roles assigned. What rows should the user see (typical behavior)? (1 Point)

   - None, because roles conflict
   - Only 1000, because the first role wins
   - Only 2000, because the last activated role wins
   - Both 1000 and 2000 (union of grants)

2. Which t-code is used for DCL authorization object creation? (1 Point)

   - PFCG
   - SU21
   - SU22
   - PFCG_ACCESS

3. In SQLScript, how do you declare a table variable? (1 Point)

   - DECLARE my_table TABLE (id INT, name NVARCHAR(50));
   - TABLE my_table (id INT, name NVARCHAR(50));

- ◯ DECLARE my_table AS TABLE (id INT, name NVARCHAR(50));
- ◯ CREATE TABLE my_table (id INT, name NVARCHAR(50));

4. You need the selection to be mandatory. Best fit? (1 Point)

- ◯ MANDATORY
- ◯ OBLIGATORY
- ◯ DEFAULT
- ◯ NO-EXTENSION

5. Which of the following is a valid requirement for AMDP method parameters? (1 Point)

- ◯ Parameters must be passed by reference
- ◯ Parameters must be passed by value
- ◯ Only scalar types are allowed, not tables
- ◯ Only tables are allowed, not scalar types

6. SELECT matnr, mtart FROM mara INTO lt_mara. Syntax error (or strong typing error) occurs. What's the core issue?(assume LT_MARA is internal table) (1 Point)

- ◯ INTO must be replaced with INTO TABLE
- ◯ FROM mara must be FROM @mara
- ◯ comma should be removed

- ◯ UP TO must appear before INTO TABLE

7. CDS views can be extended to add new fields without touching the original view (1 Point)

- ◯ True
- ◯ False

8. A SELECT-OPTIONS allows intervals. User enters LOW = 10, HIGH = 20. Which OPTION matches? (1 Point)

- ◯ EQ
- ◯ CP
- ◯ BT
- ◯ GT

9. Which of the following is a correct way to define a parameterized CDS view? (1 Point)

- ◯ DEFINE VIEW my_view WITH PARAMETER p_date AS SELECT FROM..
- ◯ DEFINE VIEW my_view (p_date) AS SELECT FROM ..
- ◯ DEFINE VIEW my_view WITH PARAMETERS p_date: abap.dats AS SELECT FROM ...
- ◯ DEFINE VIEW my_view PARAMETER p_date AS SELECT FROM ...

10. You must implement a standard-provided enhancement with multiple possible implementations, activated by customizing and filter values. Best fit? (1 Point)

- ◯ User exit (SMOD/CMOD)
- ◯ Enhancement point
- ◯ Implicit enhancement at end of include
- ◯ BAdI (new, via Enhancement Framework)

11. What is the restriction regarding write access in AMDP methods? (1 Point)

- ◯ Write access is not permitted to tables with SAP buffering activated.
- ◯ Write access is allowed to all database tables.
- ◯ Write access is only allowed to clustered tables.
- ◯ Write access is only allowed to transparent tables.

12. You need to dynamically hide/disable a selection-screen field based on another field's value (1 Point)

- ◯ AT SELECTION-SCREEN
- ◯ INITIALIZATION
- ◯ AT SELECTION-SCREEN OUTPUT
- ◯ AT LINE-SELECTION

13. What is the primary purpose of a CDS association? (1 Point)

- ◯ Force an inner join in every consuming SELECT
- ◯ Replace foreign keys in the database

- ◯ Automatically apply authorization checks
- ◯ Define a reusable relationship that can be joined on-demand by consumers

14. Constructor can only have _____ parameters (1 Point)

- ◯ EXPORTING
- ◯ IMPORTING
- ◯ CHANGING
- ◯ RETURNING

15. What is the purpose of the @AbapCatalog.sqlViewName annotation in a CDS view? (1 Point)

- ◯ To define the OData service name
- ◯ To specify the SQL view name in the ABAP Dictionary
- ◯ To set the user authorization
- ◯ To enable client handling

16. **You write:** SELECT COUNT(*) FROM mara INTO TABLE lt_counts. Syntax error. Why? (1 Point)

- ◯ Aggregate returns one row; target must be structure, not an internal table
- ◯ COUNT requires GROUP BY
- ◯ * isn't allowed in COUNT

17. CDS views associations replaces ? (1 Point)

- ◯ JOINS
- ◯ FOR ALL ENTRIES
- ◯ NONE

18. You have a method parameter typed to an interface zif_logger. The caller can pass any implementing class. What principle is this leveraging? (1 Point)

- ◯ Encapsulation
- ◯ Polymorphism
- ◯ Inheritance
- ◯ Reusability

19. Which system variable holds the list level number during AT line selection event (1 Point)

- ◯ sy-pageno
- ◯ sy-lisel
- ◯ sy-linct
- ◯ sy-ucomm

20. **Why is calling BAPI_TRANSACTION_COMMIT often necessary after a "create/change" BAPI?**

- .It refreshes SAP buffers only
- Many BAPIs perform updates in LUW and require an explicit COMMIT to persist changes
- It converts synchronous RFC to asynchronous RFC
- It forces update tasks to run in dialog work process
